Connect and buy services

1 Think mobile

Have you considered a solution that works with your guest and staff mobile devices?

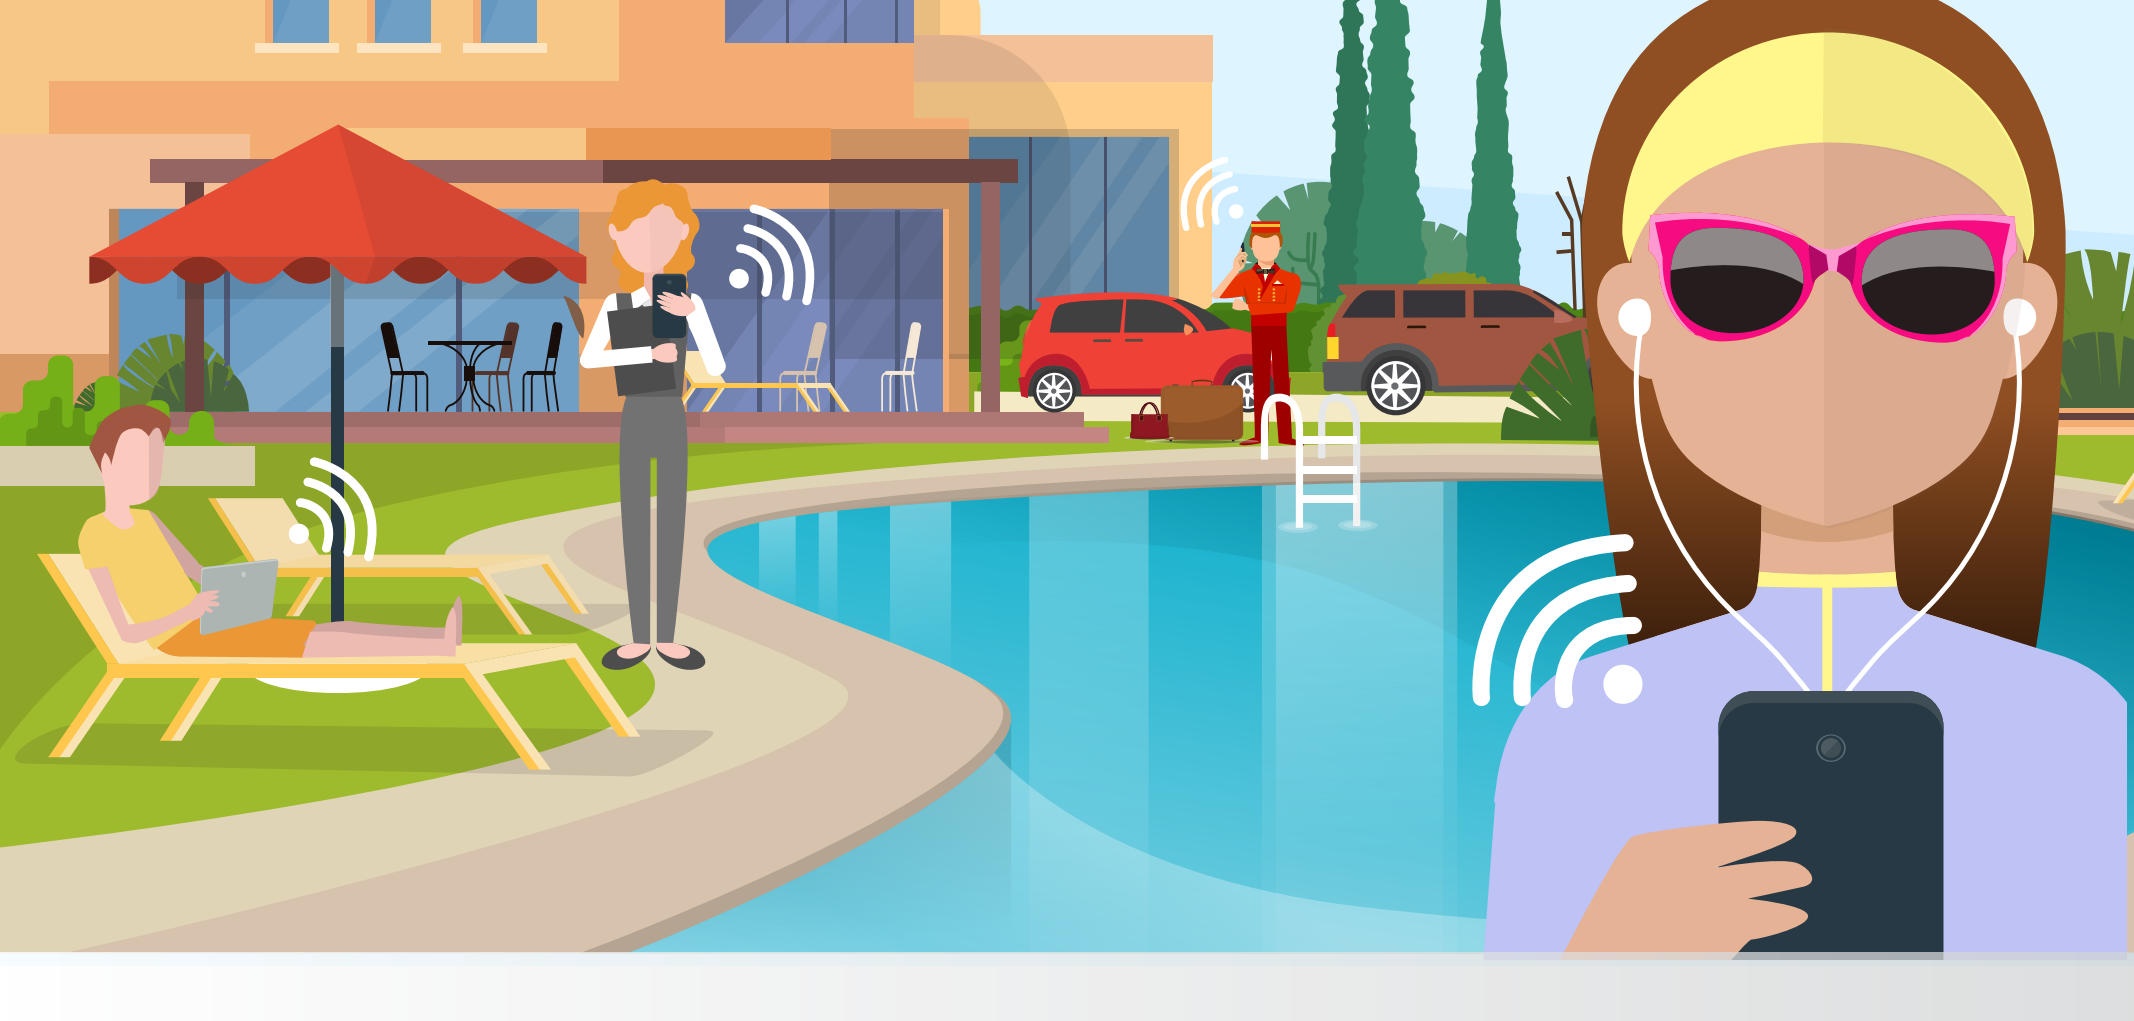

2 Enable employee mobility

Anywhere on the property

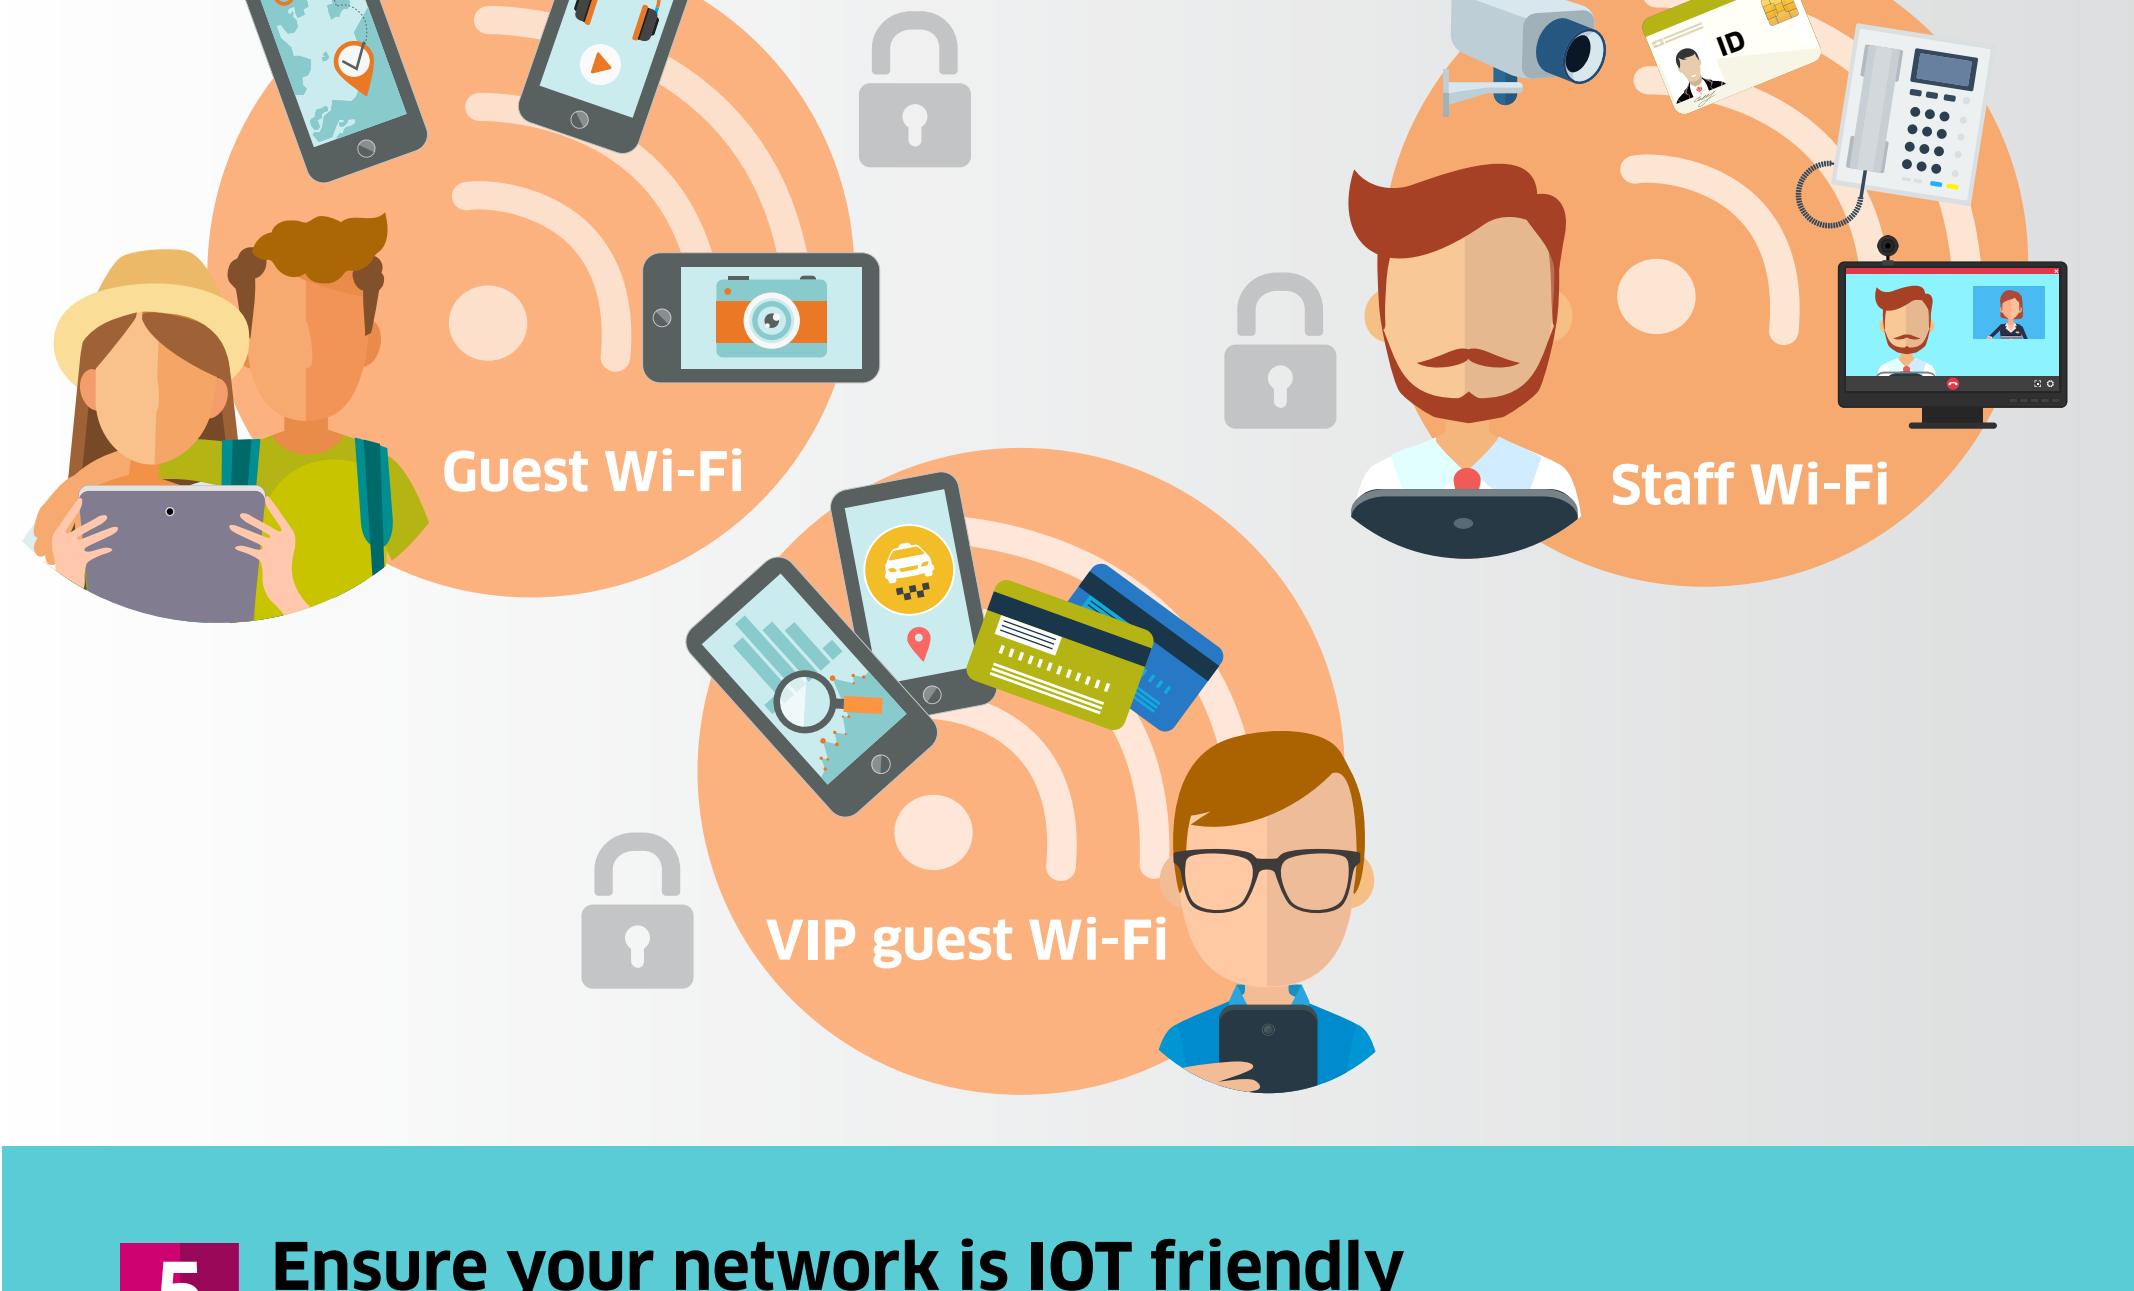

3 Deploy pervasive wireless

Think outside guestroom and lobby!

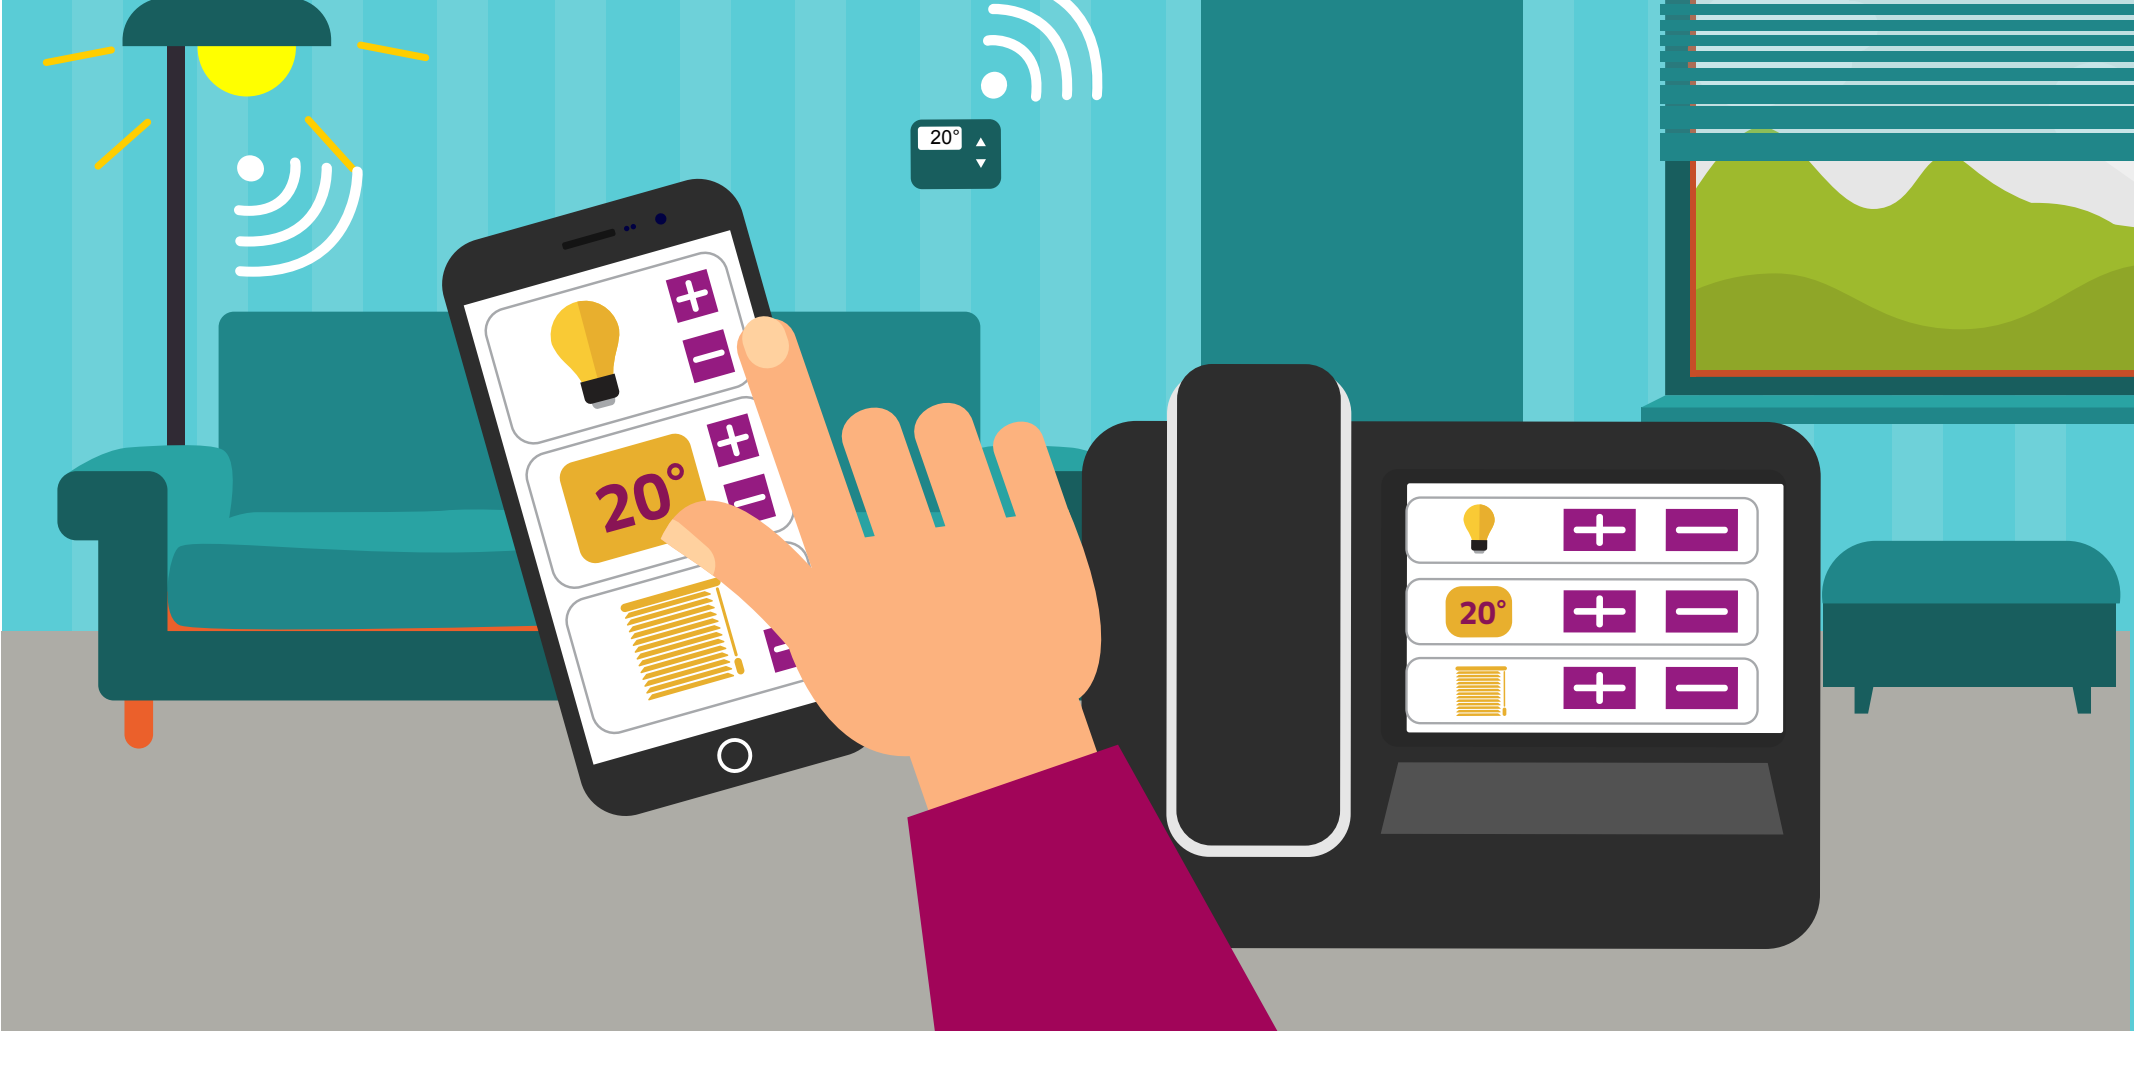

4 Enable user-based access

Personalized and secured. For the different hotel populations. Protect access to your internal information and to guest personal data

5 Ensure your network is IOT friendly

Is your network able to manage increasing connected devices and connected guestrooms?

6 Multi-layer security approach

Protect your network from security breaches or ransomware

User-level protection

Device-level protection

App-level protection

Make your hotel mobile!
Start today! Push your hotel at the forefront of technology.
